

## Robust Student Management

School administrators, teachers and parents can all work more closely with SchoolFly Network's Student Management System to enhance the child's education and lower administrative costs. Our low cost yet powerful system securely tracks all student information such as:

- Parent or legal guardian contact information.
- Attendance and tardy records.
- Medical history, immunizations and allergy information.
- School nurse visits and health issues.
- Student disciplinary events and actions taken.
- Class schedules, homework assignments and grades.

All of this information is securely shared to school administrators, student's teachers, and most importantly, parents. Parents can receive live email updates on their children and use the internet to view their child's information.

**Sign up TODAY!**

### Access Attendance Records

- Administrators record student absences.
- Teachers can immediately record tardiness from their classroom.

### Medical Info at Your Fingertips

- Administrators, primarily school nurses, can track and access all student health history.
- Teachers can reinforce student diets by referencing student allergies.

### Track Disciplinary Actions

- Teachers enter student discipline events from their classroom.
- Parents are immediately notified of their child's disciplinary infractions via email.

### Grades from Anywhere

- Administrators run and print grade reports at once with a single click.
- Parents can view their child's daily assignments and grades online.

### Completely Data Driven

- Administrators can manage all the information about their schools with custom data driven codes.
